PRODUCT BRIEF

FireFly™

FUSE CUTOUT INDICATOR

- *ULTRA BRIGHT FLASHING RED LED*
- *FLASHES FOR 30+ DAYS WHEN ACTIVATED*
- *LONG LIFE LITHIUM BATTERY*
- *SIMPLE TO INSTALL*
- *NO SERVICEABLE PARTS*
- *20 YEAR SERVICE LIFE*

FireFly™ installed on fuse barrel

The FireFly™ makes finding a dropped fuse cutout quick and easy. When the fuse blows and the cutout drops to the inverted position the FireFly™ activates a flashing high intensity Red LED. The fuse can be seen up to a mile away at night so line crews can keep their eyes safely on the road while searching for the fuse. No more hunting with a spotlight.

The FireFly™ electronics are encapsulated in UV stable moisture resistant polycarbonate. It's internal lithium ion battery will last up to 20 years in both hot and cold environments. The FireFly's™ novel clip design permits installation of the FireFly™ on an installed fuse with a shotgun hotstick.

Specifications:
Temperature Range: -40 - +70 C
LED Flashing Rate: 3 Hz
Activation Life: 1,000 Hours Continuous Service
Expected Inactive Life: 20 Years

*Patent Pending
