CAPACITOR CONTROL

A REVOLUTION IN  
DISTRIBUTION CAPACITOR CONTROL

A revolution in Distribution Capacitor Control, the Telescada NeXVar™ Capacitor Control incorporates a simple-to-use, intuitive touchscreen to view control status and real time information. The NeXVar's™ wide angle, full color display makes obsolete the ancient blinking lights, rotary dials, toggle switches and 2 line displays of old fashioned capacitor controls.

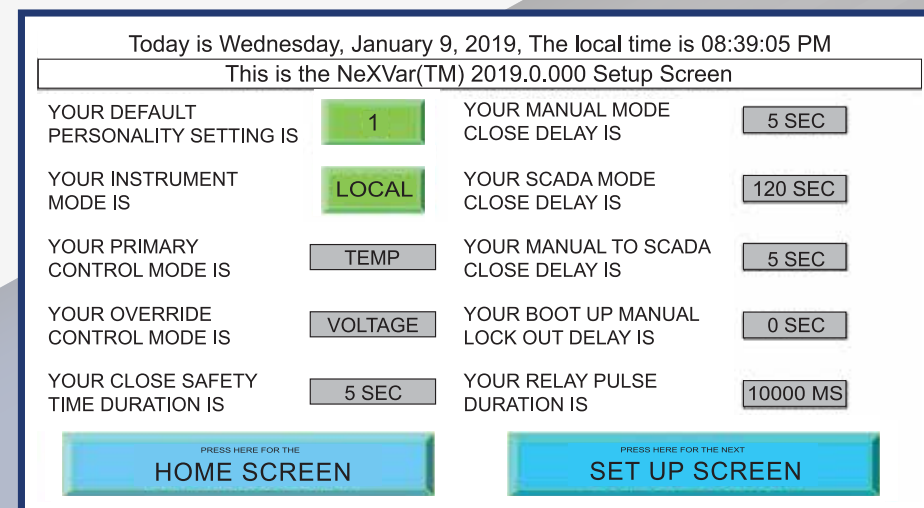

### Autonomous Capacitor Control Functions & Capacitor Bank Monitoring

- Voltage Control
- Temperature Control
- Time of Day Control
- Var Control
- Neutral Current Monitoring
- 3  $\Phi$  Voltage, Current and Var Measurement

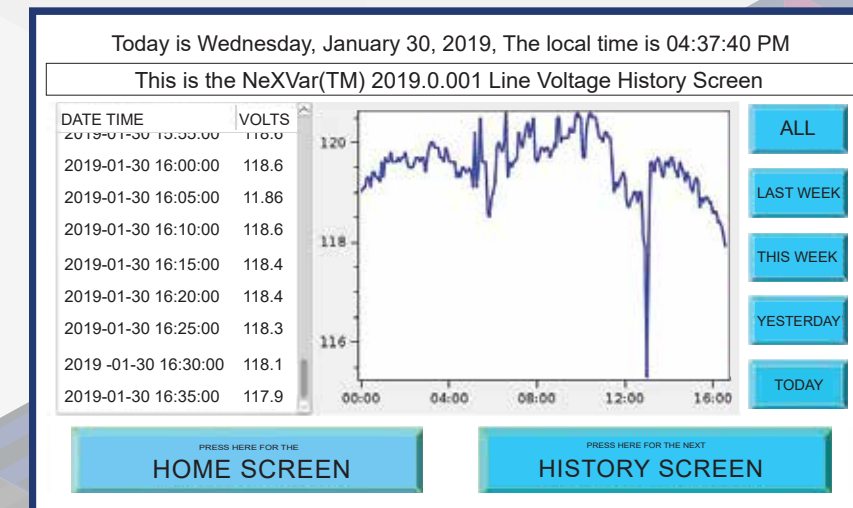

### 2-Way Wireless Distributed Control

- DNP
- Modbus RTU & ASCII

Quickly and easily view and modify autonomous Capacitor Control schemes and Control functionality or choose from a library of pre-set, 1-click Control “personalities”™

Password protected Bluetooth and WiFi connectivity makes viewing, modifying and controlling the NeXVar™ a snap, with your smart phone or tablet without leaving your vehicle.

Real time and historic data logging of all monitored parameters at the touch of your instrument screen.
